Aironic Active Cooling Helmet

SKU: PN629AC

Key Features

Provides safety, comfort and adaptive cooling experience.

Built to last with high-quality material, ensuring durability and reliability even in challenging working conditions.

Designed for high-temperature and low-ventilation zones.

Comes with rechargeable and certified li-ion battery.

Designed for 40°C to 60°C environments.

Active Cooling unit has an average working life span of about 11,000 hours.

Has lower noise levels below standard norms with higher efficiency.

Easy navigation switches between heating and cooling modes.

Zero maintenance and zero risk of leakages.

Charges in 1 hour with internal battery and 4 hours with external battery.

Certification:

IS 2925:1984

Description

Stay safe and comfortable in extreme conditions with the AiroNic ActiveCooling Helmet PN 629AC. This lightweight, compact helmet features adaptive cooling technology, perfect for high-temperature environments from 40°C to 60°C. Crafted from durable materials, it withstands the rigors of boiler rooms, construction sites, and more. With a rechargeable li-ion battery offering 11,000 hours of cooling, it operates quietly and efficiently. Easily switch between heating and cooling modes, ensuring maximum comfort without maintenance concerns.

Warranty: 1 year from the date of invoice against any manufacturing defects

Product Specifications

Material of Shell	Injection Molded Polymer
Visor Material	Polycarbonate
Type of Adjustment	Ratchet
Corrugation	Triple
Cradle Adjustment Points	4 Points Adjustment
Type of Chin Strap	4 point (Y-shaped chin strap)
Battery Option	Internal
