Description

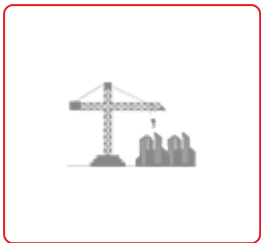

Introducing the KARAM Plastic Cap Frame FT171(02), expertly designed for superior face protection when attached with visor in demanding environments. Made from durable polypropylene (PP), this safety shield safeguards against molten metal splashes, impact, and harmful radiation, including UV and IR exposure. Its frameless design provides an expansive, unobstructed field of view, enhancing visibility. Offering Level B impact resistance (EN 166), it's compatible with clear and IR5 polycarbonate lenses featuring an anti-scratch coating. The ratchet adjustment ensures a secure fit for various head sizes, making this full face shield an essential component of your welding PPE.

Warranty: 1 year from the date of invoice against any manufacturing defects.
